

## Stories

**As part of the Green Activists for Climate Friendliness Erasmus+ project, participants researched and wrote inspiring stories about well-known climate activists. Through this activity, they explored global environmental movements, learned about impactful actions, and reflected on how individual voices can drive change.**

~~It~~ It all started ~~at~~ in <sup>New York</sup> 1937, it was <sup>heavily</sup> raining and lightning bolts were piercing the sky. The notorious Jane Fonda was born. The world knew, that this is time, the beginning of lifeline ~~sequence~~ <sup>sequence</sup> of events to come.

She was born in a family of well known people, but was destined to ~~be~~ to become one. Since her childhood she was all into arts. She was visiting ~~different~~ <sup>different</sup> art schools, and soon became an important figure at the time. But all have changed when she met her first husband. ~~As~~ a result of contemptuous actions by ~~his~~ <sup>her</sup> husband (cheating, immoral behaviour), she was completely heartbroken and traumatised. At that dark, flooded room filled with tears, she made a life-changing decision — the world will never see her that week <sup>ever</sup> again.

Since then she has lived many lives from an actress to a politician, fitness model, civil rights, anti-war activist. The most crucial part of her life began in 2019.

She got a role in the movie and she was going to the casting. She was impressed by the movie as the decorations were terrifying; the blood was everywhere <sup>where</sup> ~~almost~~ <sup>dead</sup> ~~was~~ <sup>was</sup> flowing. Even though she knew it was a stage she was deeply moved by such a consequence of climate change.

But ~~in~~ 3 months she went to California. She was caught ~~in~~ wild fires over the Hollywood. She ~~was~~ <sup>was</sup> ~~in~~ <sup>in</sup> ~~the~~ <sup>the</sup> ~~area~~ <sup>area</sup>.

The sky was full of dust, ~~deads~~ <sup>deads</sup> were falling down into the ground. She realised that this is not imaginary, it is happening in real life. ~~She~~ <sup>She</sup> ~~was~~ <sup>was</sup> ~~deeply~~ <sup>deeply</sup> ~~frightened~~ <sup>frightened</sup> and that is how her green ~~activist~~ <sup>activist</sup> career ~~began~~ <sup>began</sup>. She was actively participating in social ~~and~~ <sup>and</sup> events ~~where~~ <sup>where</sup> ~~she~~ <sup>she</sup> ~~was~~ <sup>was</sup> ~~participating~~ <sup>participating</sup> 5 times, what will happen next is only only time will tell us, but we are sure that the next chapter will determine the fate of our beloved planet Earth.

## Greta Thunberg

In the early 21st century, a horror spread across the world. It had no face, no wings, yet destroyed forests, polluted the air. People saw it happening, but they "ignored it. Then a loud noise echoed. "How dare you" said a young girl.

Nobody would believe a young girl with a simple sentence could touch people's lives and make a difference. This girl was Greta Thunberg. Born in a Swedish family, raised by a mom who is an opera singer, and a dad who is an actor, Greta soon discovered that the world was coming to an end. At the age of 10, she refused to eat animal products and became a vegan.

But how did everything start?

On a usual school day in 2010, Greta's primary school teacher showed the class a video showcasing the impact of climate change on polar bears. Having watched the video, Greta was stunned and could not hide her shock. ~~After that,~~ ~~she~~ For a few days, she could not either speak or eat. Finally, she decided that she needed to do sth regarding this matter. She sat outside the parliament skipping her classes and

Once upon a time, there was a young prince named Leonardo, who loved nature. As he grew older, he saw the forests wither and rivers become polluted. Troubled by this, he decided to act.

Inspired by a dream in which a forest spirit told him to become a protector of nature, Leonardo began using his fame to raise awareness about climate change and pollution. In 2014, he was appointed as a UN Messenger of Peace, focusing on environmental issues.

Through his foundation, he supported projects to protect biodiversity and promote clean energy. He traveled the world to witness environmental damage firsthand and urged global leaders to act. Leonardo's efforts inspired people worldwide to care for the Earth.

His legacy continues to inspire future generations to protect the planet.
