

Ways to save the world

As part of the Green Activists for Climate Friendliness Erasmus+ project, participants wrote about creative and innovative ways to help save the world. From eco-friendly inventions to community initiatives, they shared imaginative solutions to tackle environmental challenges and inspire positive change.

19. Use less tissue
20. Put recycling containers
21. Sort out the garage

1. Choose your transport to school
2. Don't overconsume
3. Don't throw trash
4. Don't use single use items
5. Choose green recommendations
6. Eat local
7. Support local
8. Try to minimize waste
9. Conserve water
10. Conserve energy
11. Bring light
12. Try not to use straw
13. Book your trips with sustainable organizations
14. Explore local culture
15. Spread seeds around
16. Use less clothes
17. Sort out the garage

SAVE THE WORLD

Do

- Drink tap water ✓
- Buy Glass drinks ✓
- Bring your food ✓

Don't

- Consume Plastic
- over consume X

- ✓ - Use secondhand clothes
- Buy only necessary clothes

- Fast fashion
- Unnecessary clothes X

- ✓ Hunt your food
- Eat Junk food X

- ✓ - Spread awareness
- I ignore it X

BIG HOPE

BIGGER RISKS !!!

- ✓ Very ambitious goals. - The renewable energy is unpredictable.
- ✓ Renewables aren't perfect - building enough of them is a big challenge.
- ✓ The switch is very expensive - who will pay?
- ✓ Hydrogen hype - no one knows if it will work.
- ✓ Countries aren't on the same page.
- ✓ Coal isn't gone yet - some countries heavily remain on coal.
- ✓ Trial and Error = Wasted time?
- ✓ Risk of Energy shortages - moving too fast can leave us stuck with high electricity prices.
- ✓ Big changes take time - the EU acts like 2050 is tomorrow.
- ✓ Too much bureaucracy - big funding for nothing.
